[All Kids Bike®](#) is a national movement led by the Strider® Education Foundation to place [Kindergarten PE Learn-To-Ride Programs](#) into public schools for free, using donations from individuals, businesses, and organizations. We want to make **riding a bicycle** the fourth "R" of elementary education, along with reading, writing, and arithmetic. The ability to ride improves a life greatly while developing **balance, mobility, safety, environmental awareness,** and facilitating **exercise**. It instills **confidence** in the classroom, home and community. This value fuels our commitment to help every kindergarten child gain this advantage in life by equipping classrooms with Strider 14x AKB-Specific Bikes and [Kindergarten PE Learn-To-Ride Curriculum](#).

By introducing bicycle riding to students on the revolutionary **Strider 14x AKB-Specific Bike** in balance mode, children and teachers will progress through the riding process void of fear and full of encouragement. As **confidence** and **proficiency** grows in riding, the **Strider 14x AKB-Specific Bike** is easily converted from balance mode to pedal mode in minutes. *This allows for a seamless transition to pedals for the rider without having ever used training wheels.* Designed with teachers in mind, the **Strider 14x AKB-Specific Bike** has no-flat tires, an integrated kickstand, and easily adjustable handlebars.

The [Kindergarten PE Learn-To-Ride Program](#) includes teacher training and certification, a structured (8) lesson curriculum, a fleet of (24) Strider 14x AKB-Specific Bikes with integrated kickstand, helmets, pedal conversion kits, one Strider 20" teacher instruction bike, and a five-year support plan.

The [All Kids Bike](#) program eliminates three potential barriers that have traditionally derailed the use of bikes and curriculum in the classroom:

1. The Kindergarten PE Learn-To-Ride Curriculum meets SHAPE America national standards for easy approval and is formatted for immediate **plug-n-play**.
2. The Strider 14x AKB-Specific Bikes are small, light, and easy to store. Floor, wall, and mobile **storage suggestions** and plans are provided.
3. The Strider 14x AKB-Specific Bikes are very simple, extremely durable, and **require minimal maintenance** and adjustment. The bike also includes no-flat tires to eliminate the time needed to keep tires inflated.

Bringing this program to your community requires a limited time investment and provides **maximum impact**.

Start-to-Finish steps:

1. School administration approves implementing the [Kindergarten PE Program](#)
2. School (or school system) applies via the [All Kids Bike School Application](#).
3. Donor contributes the funds to the foundation to [adopt the school](#).
4. The Foundation issues electronic training tokens and teachers complete online training.
5. The Foundation ships the program equipment to the school(s). Hundreds of kids learn to ride!

In all, the [Kindergarten PE Learn-To-Ride Program](#) provides an inclusive learn-to-ride opportunity packed with fun, gratification, and success for **less than \$10 per student**.

For more information, please visit [www.AllKidsBike.org](http://www.AllKidsBike.org).

\*\*NOTE: Schools have various obligations for child safety and privacy which all parties must honor. Donation of the program to the school does not entitle the Foundation or the Donor to involvement at the school. Any participation in bike delivery and/or build day will be at the discretion of the school.
